PROJECTS

EZ Bulletin App (FYP - React Native App)/ Python (02/2022 - 04/2023)

- **Link:** https://github.com/umaisiqbal/FYP3_Android-App
- Created the EZ Bulletin App using React Native and React.js, providing AI-based news summarization. Implemented Firebase for user authentication and database integration, delivering latest, trending, and location-based news with Python technology.

ECCommerce App (02/2022 - 04/2022)

- Developed and optimized an e-commerce app for a company with team, enhancing user interfaces and integrating secure payment gateways. Implemented dynamic state management and launched features like product recommendations and user reviews.

Weather App | Angular (web) (10/2021 - 12/2021)

- **Link:** <https://github.com/umais777/openweather>
- Developed a Weather App for Semester Project that shows the Humidity and Temperature with Rain chances of selected location

Sahan Trip (11/2023 - 03/2024)

- Sahan Trip, a React Native application developed, offers users seamless access to airline services. From flight searches to booking management, users can effortlessly navigate available slots and streamline their travel experience.

Maqan App (09/2023 - 11/2023)

- Simplifying accommodation booking for flats, houses, and hotels, offering a user-friendly platform with extensive rental options and seamless transactions
